Multi-language Support
24*7 Customer Service Hotline

Service Advantages

Secure

- 7-layer 24*7 security mechanism for all data center anti-attack systems in the perimeter network
- 24*7 dead space free surveillance and state-of-the-art firefighting equipment with round-the-clock fire watch

Reliable

- All data centers are dual power feeds
- Average uptime up to 99.98%
- Round-the-clock minute level O&M demand response

Professional

- All DCs are built as per the highest industry standard
- All electromechanical equipments are top-of-the-line international brands
- Meet-Me-Room (MMR) can access diverse carrier networks
- Global data center nodes are connected to each other
- Professional advisor-customized hosting solution

Relieved

- Sophisticated emergency response plan
- Professional O&M and equipment team with rich work experience in related fields
- Strict adherence to the provisions of International Data Protection Regulations
- All data centers are owned and operated by BDx

Engineering the Digital Future

Design best-in-class “Build-to-Suit” and colocation solutions

Unparalleled project management with 100% on-time project delivery in strategic locations with customers' needs in mind

Deliver a consistent global standard of operations across sites

Our operational capabilities are rated as “Best-in-Class” by hyperscale customers

Maximize access to Internet eyeballs

Delivering 100% eyeballs either directly inside the DC or within 1ms latency by strategic locations with customers' needs in mind

Provide renewable power solutions in green DCs

Strong emphasis on achieving both our customers' and our sustainability targets by strategic locations with customers' needs in mind

Leverage strong relationships with Enterprise Customers

Facilitating enterprises in creating an efficient hybrid cloud environment in our data centers targeted by strategic location with customers' needs in mind
